

Executive Project Status

Date: June 26, 2025

Project: Loan Management System – The First MicroFinance Bank

Version: 1.2 (updated 19 June 2025; React & Node.js removed from scope)

Overall Health: On Track (no critical issues)

Progress

- Laravel setup complete, including environment and database configuration
 - Authentication system with roles and permissions scaffolded and operational
 - Staff/roles migrations and seeder scripts underway
 - Role-based login functionality currently in development
-

Next Steps

1. Finalize Week 1 deliverables—complete migrations, seeders, and login implementation
 2. Begin Week 2 tasks: form development, schema changes, validation logic
 3. Continue agile execution with daily standups and sprint tracking
-

Problems

- None at present; all tasks remain on schedule with no impediments
-

Brief Project Plan (v1.2)

- **Tech Stack:** Laravel (MVC, Services, Policies), MySQL; frontend uses HTML/CSS/JS with dedicated print styling
 - **Week 1** (completed): Project setup, authentication scaffold, database configuration, initial migrations, login flow
 - **Week 2** (in progress): Receptionist data entry form, schema extensions, validation framework
 - **Weeks 3–6:** Roll out loan officer dashboard (filters, “Pay Schedule” action), build detailed customer view with printing support, render repayment schedules with print-friendly CSS, perform automated testing, complete QA/UAT, and deploy
-
